

Elegant
corner
solution

Automated power suspension

In kitchens, you will often find unused space underneath the wall cabinets, especially in corners and next to tall cupboards. This is where the EVOLINE V-Port can be installed. In its closed position, the V-Port is concealed within a discreet and elegant stainless steel housing. A gentle touch releases and drives down an individual multiple socket rail; as an option a USB charger module is available.

Description	Image	Specification	Order No.
<p>EVoline V-Port For right-angle installation. Black anodised aluminium housing. VDE compliant power outlets, 60 degrees, 16 A, touch-protected 2,5 m supply cable enclosed separately.
